

# SofTrack Auditing Services

## Workstation File Use Activity and Browser Auditing

### Overview

SofTrack helps you audit workstation activity. Discover file open, create and delete requests, application launches and browser activity from any browser. By utilizing SofTrack's local agent technology all actions local and remote are captured. SofTrack helps you comply with industry regulations such as HIPAA and SOX. Activity logs are maintained in a ready-to-use format for quick incorporation into the reports you need. SofTrack helps you track activity of your Windows® workstations and Terminal Server Sessions.

SofTrack installs quickly and simply into your existing infrastructure with no downtime required. Contact us today for your live demonstration of SofTrack.

### Benefits

- Compliance with regulatory needs such as required by HIPAA and Sarbanes-Oxley (SOX);
- Discover file copy operations;
- Fully document workstation usage provides evidence of all activity performed;
- Assist helpdesk operations by having comprehensive audit trail of user activity that is continuously updated;
- Facilitate migration needs, all remote activity is fully revealed so you know where the files are that your users need, further details [provided here](#);
- All data collected is maintained in a secure directory at the server;
- Identify new application installations for license compliance.

### Features

- Operates as a system kernel service, tracks all user activity;
- Each record includes Date, Time, Workstation name and IP address, User name and file/url path accessed;
- Captures Process name File Creation events – discover processes used for file creation;
- Reveals file copy operations;
- Separately tracks EXE file creations associated with new application installations;
- For Windows Server installations, local user logon name is tracked;
- Tracks/Audits all sites visited with any browser (IE, Firefox, Chrome, etc.)
- Supports all versions of Windows® Terminal Services and Citrix®.
