

SofTrack Macintosh Support

Compliance and Inventory for MacOS9 and MacOSX

Overview

SofTrack provides application usage compliance and hardware plus software inventory support for your Macintosh® workstations. Use SofTrack to concurrently control software use across your Macintosh® OS9 and OSX workstations. Discover all software installed on each your Macintosh workstations. SofTrack gives you the ability to share and enforce cross-platform application licenses between your Windows® and Macintosh® workstations. Automatically discover applications installed and how they are used.

SofTrack installs quickly and simply into your existing infrastructure with no downtime required. SofTrack's Macintosh support requires at least one Windows® and/or NetWare® server. Contact us today for your live demonstration of SofTrack.

Benefits

- Prevent unnecessary copyright infringement lawsuits with complete Macintosh® workstation support for license compliance;
- Automatically detect software being used versus software that is installed and not being used – find unused applications and save money by redeploying or decommissioning;
- Maintain a comprehensive audit trail of hardware and software installation/removal – discover unusual activity and enforce corporate standards;
- Combine Windows® and Macintosh® application licenses and enforce compliance;
- Audit trail of all application-use to satisfy regulatory requirements.

Features

- Operates as a system kernel service, tracks all user application launches;
- Inventory Agent requires less than 45 seconds to gather a complete hardware and software inventory of your workstation;
- Inventory data is collected to a secure server directory and is available for immediate reporting;
- Change tracking reports are immediately available upon receipt of new workstation inventory;
- Inventory data can be collected from remote workstations via email or other method of your choice;
- Tracks user accounts added/removed from each Macintosh;
- Collects workstation serial number including ROM version data;
- Supports all versions of Macintosh® OS9 and OSX.
