

SofTrack and Terminal Services

License Compliance for Citrix® and Windows® Terminal Services

Overview

SofTrack helps you ensure license compliance of software used in your Terminal Service environments. SofTrack's software metering technology provides you with the ability to actively control and/or passively record software use. Use SofTrack to enforce your software licenses and maintain your license compliance. SofTrack's management-ready reports show you details of software use that you can use to negotiate license renewals and upgrades.

SofTrack installs quickly and simply into your existing terminal service infrastructure with no downtime required. Contact us today for your live demonstration of SofTrack.

Benefits

- Stay in control of your software use and maintain software license compliance
- Reduce risk of software license non-compliance (copyright infringement) when you control software use
- Save money on software upgrades and license renewals when you purchase only what you need
- Control software use between terminal servers — maintains your license compliance throughout your network
- Management-ready software usage reports show you how your software is used
- Charge-back software use reports can be optionally activated to enable per-use billing of software
- Receive file activity audit reports for compliance with HIPAA and SOX

Features

- Actively enforce software usage
- Passively track software usage
- Management reports of software use
- Supports up to 3,000 Simultaneous Terminal Service Sessions per server
- Supports servers with up to 256 CPUs
- Detects all 16bit, 32bit, 64bit software
- Includes idle application detection and optional termination
- Tracks/audits all files opened including the TCP/IP address of the user opening the file
- Tracks/Audits all sites visited with any Browser
- Block unauthorized software installations such as web downloads
- Supports all versions of Windows® Terminal Services and Citrix®
